Hybrid Red Beet

Technical Specifications

Pop Vriend Seeds

Focus is in our genes.

Front runner

Combining over 60 years of experience with innovative technology gives us a leading edge in vegetable seed breeding.

Piet Geraets
Product Manager Red Beet

Sustainable growth

We export our vegetable seeds to over 100 countries around the world.

Marnix de Kroon
Red Beet Breeder

Un-beet-ably sweet

The high brix levels in our red beet varieties make them ideally suited for beet juice.

Super specialist

We focus on a limited number of crops in which we strive to be a top 3 player.

The power of partnership

Our passion for great genetics combined with KWS's superior technology already delivered some great results.

Scarlett F1

Suitable for fresh market, processing and storage

Scarlett has an improved quality and shape, shows a more balanced plant and grows less vigorous compared to Jolie. During spring and summer tops remain very healthy resulting in a high brix and flexible market positioning.

Worth mentioning is the shorter cooking time, round shape and an easy skin release, which makes Scarlett also a winner for cooked, peeled and vacuum packing.

Shape: Round beet
Tops: Medium strong
Maturity: Medium early
Sowing period: Spring and Summer season
Density: 400.000-500.000 seeds/ha
Harvest: Belt + top lifting
Colour: Very dark red
Brix: 11-12
Dry matter content: 13%
Betanin content: 0,65 g./100 g.
Features: High quality round beet with excellent uniformity.

Jolie F1

Suitable for fresh market and storage

Jolie can be sown in spring and autumn and offers a very round production. Maturity is on average two weeks later compared to Scarlett.

Jolie is suitable for fresh market and storage. A good taste is assured at all times thanks to a high sugar content.

Shape: Round beet
Tops: Medium strong
Maturity: Late
Sowing period: Late Spring and Early Autumn season
Density: 400.000 seeds/ha
Harvest: Belt + top lifting
Colour: Medium dark red
Brix: 11-13
Dry matter content: 13%
Betanin content: 0,6 g./100 g.
Features: Later maturing hybrid with good uniformity and high yield.

Bullock F1

Suitable for fresh market and storage

Our newest release Bullock has a unique genetic background that offers growers a reliable plant stand.

Bullock produces round beets that are slightly larger in size than Jolie. Bullock's maturity is comparable to Jolie.

Shape: Round beet
Tops: Medium strong
Maturity: Late
Sowing period: Late Spring and Early Autumn season
Density: 400.000 seeds/ha
Harvest: Belt + top lifting
Colour: Dark red
Brix: 10-12
Dry matter content: 13%
Betanin content: 0,6 g./100 g.
Features: Later maturing hybrid with good uniformity and very round roots.

POP VRIEND SEEDS IS A SUBSIDIARY OF KWS VEGETABLES BV

Figures and information in this brochure are based on the average results of large scale plantings under European conditions and may vary with local environmental and agronomic conditions, grower skills, microclimate and soil structure. Resistance is the ability of a plant variety to restrict the growth and development of a specific pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure.

Pop Vriend Seeds does not accept liability based on the information in this brochure for deviating results in the cultivated product. Buyers and users of Pop Vriend Seeds varieties are responsible to determine suitability of the seeds to intended cultivation and local circumstances.

All contracts for delivery of goods are subject to our general terms of sales and delivery, which you can download from our site www.popvriendseeds.com. You can also ask for a copy by e-mail via info@popvriendseeds.nl.

In addition ISF rules are in force.

Please check our website for the most updated technical specifications of our varieties.
